

Team Members: Meagan Gonzalez, Helene Kuchwara, Rahul Rakhit

Description:

- Purpose: The purpose will be to provide an online schedule planning tool for students. They will be able to view their core and major requirements and create a plan for each semester based on the classes that they need to take.
- Databases: There will be a table of majors and concentrations, a table of required courses, and a table of requirement relationships (to preserve normalization). There will also be tables for students, with log-in information and majors, and administrators.
- Admin interface: Separate interface for any school administrator to add core requirements, add major requirements, and view any student's schedule.
- API: Pure Chat, to allow students to ask questions to advisors in real-time
- Languages Used: Javascript, PHP, HTML, CSS
- Hosted On Cscilab
- Stored in a repository on Github
